

New PIT Weekly Update: Reflecting, connecting and serving the Pittsburgh region

The Transformed PIT is designed to reflect, connect and serve the Pittsburgh region through the addition of modernized facilities that feature regionally inspired innovations and architectural elements. We are building the future of air travel for the community we serve, and it was community that became the source of inspiration to elevate our design.

A sense of place – of community, of Pittsburgh – has been purpose-built into the Transformed PIT. Accomplishing this meant enlisting the expertise of local artists and craftspeople, providing depth and perspective to the passenger, partner and team member experience.

Over the next few weeks, we will feature select artists and craftspeople who are helping us infuse a sense of our community into the Transformed PIT.
